WEEKLY EPIDEMIOLOGICAL BULLETIN

WEEK **28** 06-12 July 2026

Editorial message

Effective and efficient disease surveillance systems contribute to the reduction of morbidity, disability and mortality from disease outbreaks and health emergencies.

This weekly bulletin presents the epidemiological status of the priority diseases, conditions, and public-health events under surveillance in Rwanda. These data aim to trigger a rapid response for rapid impact, actions and results oriented, a proactive preparedness, risk mitigation and prevention, intelligence, real-time information, and communication for decision making.

KEY EPIDEMIOLOGICAL HIGHLIGHTS

Event Based Surveillance (EBS) Highlights:

Alerts from Impuruza system:
1 alert

1 human death

Alerts from EIOS:
No alert

UMUJYANAMA W'UBUZIMA
MINISITERI Y'UBUZIMA
rbc RWANDA
BIOMEDICAL
CENTER
Healthy People. A Wealthy Nation

Indicator Based Surveillance (IBS) Highlights:

419 cases of immediately reportable diseases were notified by **112** health facilities nationwide. These included cases of chicken pox, severe malaria, suspected shigellosis, suspected measles/rubella, suspected Mpox, acute flaccid paralysis, suspected cholera, suspected VHF, suspected RVF, suspected typhoid fever, mumps, suspected foodborne illnesses, suspected bacterial meningitis and snake bites.

60 deaths were reported by **23** health facilities through the electronic Integrated Disease Surveillance and Response (eIDSR) system. Most deaths were perinatal deaths and deaths of children under 5 years.

Outbreaks and events updates in week 28

Weekly updates on ongoing outbreaks:

Ongoing outbreaks:

- ⚠️ Mpox outbreak
- ⚠️ Measles outbreaks in different districts of Rwanda
- ⚠️ Cholera outbreak in Rusizi district

New outbreak:

- ⚠️ Suspected Foodborne Illness occurred in Nyaruguru District
- ⚠️ Updates on Ebola Virus Disease outbreak preparedness in Rwanda

Completeness and timeliness

In Epi Week 28, the overall completeness and timeliness of surveillance data reporting in Rwanda were 99% and 97%, respectively.

Weekly updates on Event Based Surveillance (EBS)

Description: Event-Based Surveillance (EBS) is a type of public health surveillance system that detects and reports unusual health events or disease outbreaks in a timely manner. The system is designed to detect signals of potential public health threats and allow a rapid response to prevent or control the spread of diseases. RBC is implementing EBS through the PHS&EPR Division.

Currently, an electronic Community Event-Based Surveillance System (eCBS), Hotline and Epidemic Intelligence from Open Source (EIOS) are being used to detect and report events of public health importance from the community and media. The process for the establishment of other types of EBS is still ongoing.

Alerts from Impuruza system: 1 signal

1 signal was notified, from the community, it was a human death.

Alerts from EIOS: No alert recorded

WEEKLY UPDATES ON EVENT-BASED SURVEILLANCE (EBS)

Description: Rwanda had implemented Indicator-Based Surveillance according to the IDSR guidelines 3rd edition where 45 priority diseases, health conditions, and public health events are being monitored and reported from health facilities countrywide on a regular

Diseases that are prone to outbreaks are reported immediately within 24 hours after detection, while diseases that are considered endemic are reported on a weekly basis every Monday before midday.

A. IMMEDIATE REPORTABLE DISEASES - EPI WEEK 28

During this Epi week,

419 cases of immediately reportable diseases were notified by 112 health facilities:

2 cases of chicken pox (varicella) were reported by 2 health facilities.

142 suspected cases of Measles/Rubella were reported by 58 health facilities (they are described in the update on the outbreaks section)

10 cases of severe malaria were reported by 9 health facilities.

4 suspected cases of Mpox were reported by 3 health facilities; the samples were tested, and they were negative.

2 snake bite cases were reported by 2 health facilities.

2 cases of acute flaccid paralysis were reported by 2 health facilities

1 suspected case of shigellosis was reported by 1 health facility; the sample was taken and sent to the laboratory

4 suspected cases of cholera were reported by 1 health facility

14 suspected cases of typhoid fever were reported by 3 health facilities; the samples were taken and sent to the laboratory

14 suspected cases of foodborne illness were reported by 4 health facilities

192 suspected cases of RVF were reported by 41 health facilities; the samples were taken and sent to the laboratory

15 suspected cases of VHF were reported by 7 health facilities; the samples were taken and sent to the laboratory

3 Suspected cases of bacterial meningitis were reported by 1 health facility; the samples were taken and sent to the laboratory

5 cases of mumps were reported by 2 health facilities

B. WEEKLY REPORTABLE DISEASES - EPI WEEK 28

In Rwanda, after the adaptation of the IDSR guidelines 3rd edition, eight diseases events are being reported and analyzed on a weekly basis. These include flu syndrome, simple malaria, severe pneumonia for under 5 years, non-bloody diarrhea for under 5 years, COVID-19, dog bites, brucellosis, and trypanosomiasis. The monitoring trends of these weekly reportable diseases or health events helps to detect an unusual increase early.

In Epi Week 28, a thorough analysis was conducted, comparing the number of reported cases of the diseases monitored on a weekly basis to their respective epidemic thresholds. The results revealed that no disease cases surpassed the epidemic thresholds.

The figures below show the weekly reportable diseases trends:

The figures below show the weekly reportable diseases trends:

C. DISTRIBUTION OF REPORTED DEATHS IN eIDSR

As summarized in the Pie Chart below, a total of 60 deaths were reported through the electronic Integrated Disease Surveillance and Response (eIDSR) system. Among these deaths:

- 43 (72%) were perinatal deaths
- 17 (28%) were deaths of children under 5 years old

Type of deaths reported in week 28 /2026

Distribution of deaths by health facilities

60 deaths were reported from 26 health facilities as follows:

9 deaths were each reported by:

- Gisenyi DH (6perinatal deaths and 3 deaths under 5 years)
- CHUB (7perinatal deaths and 2 deaths under 5 years)

5 deaths were each reported by:

- Kabgayi DH (3 perinatal deaths, and 2deaths under 5 years)
- Nemba DH (5 perinatal deaths)

3 deaths were each reported by:

- CHUK and Ruhengeri RH (3 deaths under 5 years)

2 deaths were each reported by:

- Kirehe DH, Masaka DH, Nyagatare DH, Nyanza DH, Rwinkwavu DH (2 perinatal deaths)
- Kinihira PH (2 deaths under 5 years)

1 death was reported by each of the following:

- Bushenge PH, Butaro DH, Kabaya DH, Kacyiru Police hospital, Karongi Police HC and Musango HC in Kibuye RH, Kibirizi DH, Kibuye RH, Muhima DH, Murunda DH, Ngarama DH, Nyabitare HC in Kirehe DH (1perinatal death)
- Kiziguro DH, and Rwanda Military Hospital (1death under 5 years)

Distribution of deaths by health facilities:

OUTBREAK AND EVENT UPDATES IN EPIDEMIOLOGICAL WEEK 28

1.Ongoing outbreaks

1.1 Ongoing Mpox outbreak in Rwanda

Rwanda confirmed its first two cases of Mpox on July 24, 2024. The current situation, as of 12th July 2026, was as follows:

8098	Cumulative suspected cases
4	New suspected cases
131	Total confirmed cases
0	New confirmed cases
0	Cases under follow up
0	New discharged case

Actions taken

In response to the Mpox outbreak, significant measures are being implemented at both the central and district levels. The District Command Posts have been activated to bolster preparedness and improve response efforts. Key actions include:

- Door-to-door active case searches for early detection
- Heightened screening and surveillance in schools and public areas
- Screening at points of entry (POE)
- Ring vaccination
- Public awareness campaigns

1.2 Measles outbreaks in different provinces

For the current situation, as of 12th July 2026, it was as follows:

114 active cases, distributed in two provinces and the City of Kigali, as follows:

1. City of Kigali

70 active cases

2. Southern Province

28 active cases

3. Eastern Province

16 active cases

Actions taken

- Isolation and clinical management of identified cases
- Outbreak investigations had been carried out in these different areas affected
- Risk communication and community awareness
- Active case searching
- Vaccination

1.3 Cholera outbreak in Rusizi districts

The current situation of the ongoing Cholera outbreak in Rusizi district, as of 12th July 2026, was as follows:

149 Cumulative suspected cases

11 New suspected cases

149 Total confirmed cases

0 Cases under follow-up

Actions taken

- Case management of patients
IPC measures applied
- Conducted a detailed case investigation
- Active case searching within the community, especially among close contacts and neighboring households
- Strengthened surveillance and reporting at community and health facility levels
- Performed risk communication and community sensitization on cholera prevention and early care-seeking
- Ensured availability of essential supplies (ORS, IV fluids, antibiotics, RDTs) at affected health facilities

2. New outbreaks and events occurred

Suspected Foodborne Illness occurred in Nyaruguru District

On 8th July 2026, Cyahinda Health Centre received a notification of a suspected foodborne illness involving individuals who developed vomiting and diarrhea after consuming sorghum brew (ubushera known as Pinginya) at their neighbor house in Nyaruguru District, Cyahinda sector, Rutobwe Cell, Rubona Village. A total of 30 people were exposed, and all 30 developed symptoms. 13 patients were treated as outpatients at Rutobwe Health Post, 17 patients sought care at Cyahinda Health Centre (3 patients were treated and discharged while 14 patients remain under observation at the health centre, they were treated and discharged).

Actions taken

- Case management
- Health education
- Community case searching

3. Updates on Ebola Virus Disease outbreak preparedness in Rwanda

The activities related to the preparedness to respond to a possible Ebola outbreak in Western and Northern provinces that remained ongoing, as the Ebola Virus Disease (EVD) outbreak is currently ongoing in the neighboring countries of DRC and Uganda. In Northern Province, the PHEOC is operating in Alert mode with different sectors, EVD preparedness activities were intensified, with PHEOC staff were deployed at the Points of Entry (PoE) of Cyanika and Gatuna, as well as in the catchment areas of Byumba and Butaro Level 2 Teaching Hospital (L2TH). Enhanced border surveillance and vigilance were being maintained. In Western Province, the PHEOC was also operating in Alert mode through two functioning provincial Ebola command posts currently activated and sitting in Rubavu and Rusizi districts since week 21 (from 17/05/2026) as of this week.

eIDSR REPORTS COMPLETENESS & TIMELINESS

In Rwanda, eIDSR reports completeness and timeliness are scored as follows:

Greater or equal to 80%: High,

Between 60% and 79%: Moderate,

Less than 60%: Low.

In Epi Week 28, the overall completeness and timeliness of disease surveillance data reporting in Rwanda were 99% and 97%, respectively. All hospitals achieved high scores above 80% for completeness. For the timeliness score, one hospital had a moderate score (Muhima DH), while one hospital had a low score (CARAES Ndera). The hospital, with a moderate or low score, had been advised to submit all required reports by Monday at 12:00.

Detailed completeness and timeliness performance for all health facilities is presented in the figures below.

Details on completeness and timeliness for all health facilities are shown in the figures below.
